RELEASE 9.8

What's NEW

What's New in Release 9.8?

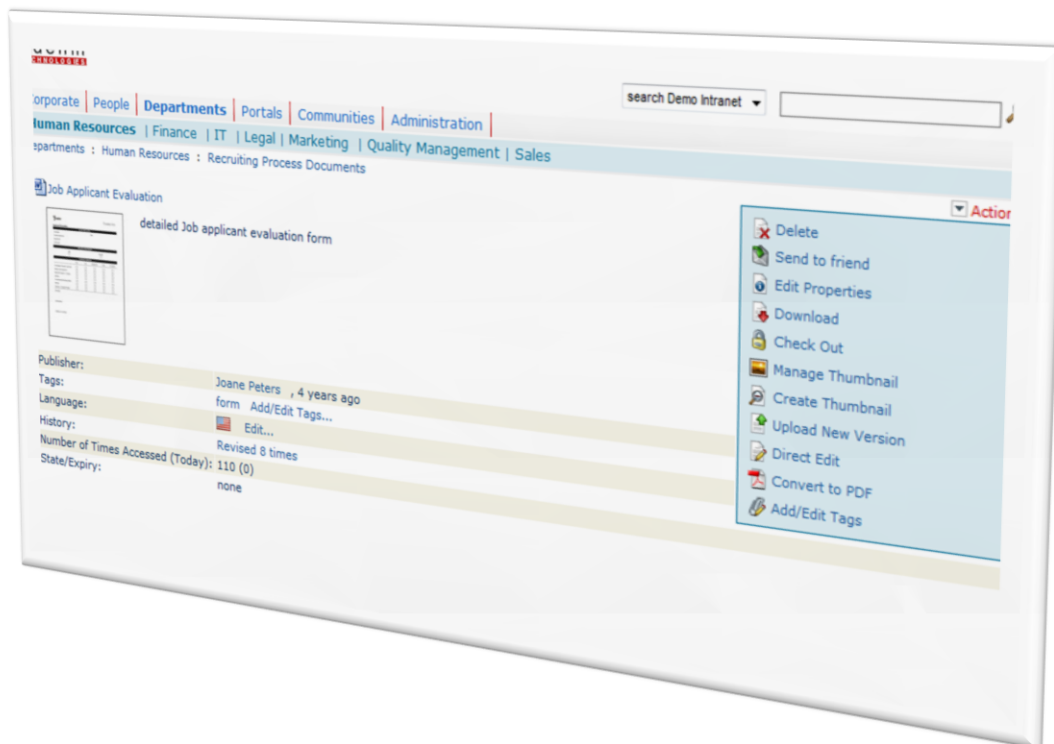

| | | |
|----------|---|----------|
| 1 | STREAMLINED USER INTERFACE | 3 |
| 2 | PORTLETS..... | 4 |
| 2.1 | ACTIVITIES..... | 4 |
| 2.2 | MY COMMUNITIES..... | 4 |
| 2.3 | ROLE MEMBER..... | 5 |
| 2.4 | RELATED CATEGORIES..... | 5 |
| 2.5 | RSS VIEWER | 6 |
| 2.6 | CUSTOM PORTLET CHROMES | 6 |
| 3 | MISCELLANEOUS | 7 |
| 3.1 | INSTANT MESSAGING | 7 |
| 3.2 | AJAX PAGING..... | 7 |
| 3.3 | SEARCH ENHANCEMENTS | 7 |
| 4 | COMPLETE CHANGE LOG | 8 |

1 Streamlined User Interface

Most usability improvements come in the replacing of various pages with in-context popup windows. The new popup windows include topic publishing, edit categories, community wizard, add tags and add ratings/comment.

The topic detail pages receive a complete redesign to match the look and feel of portal pages (e.g. the topic actions now show in a drop down list on the top right of the page):

2 Portlets

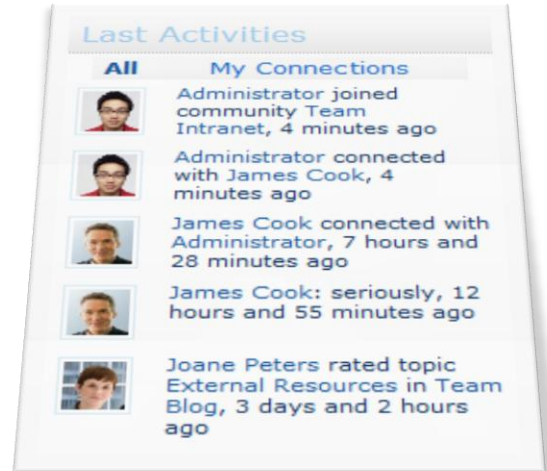

2.1 Activities

The existing News Portlets are topic-centric: They show which topics are new or updated.

The new Activities Portlet is people-centric: It shows the latest user activities.

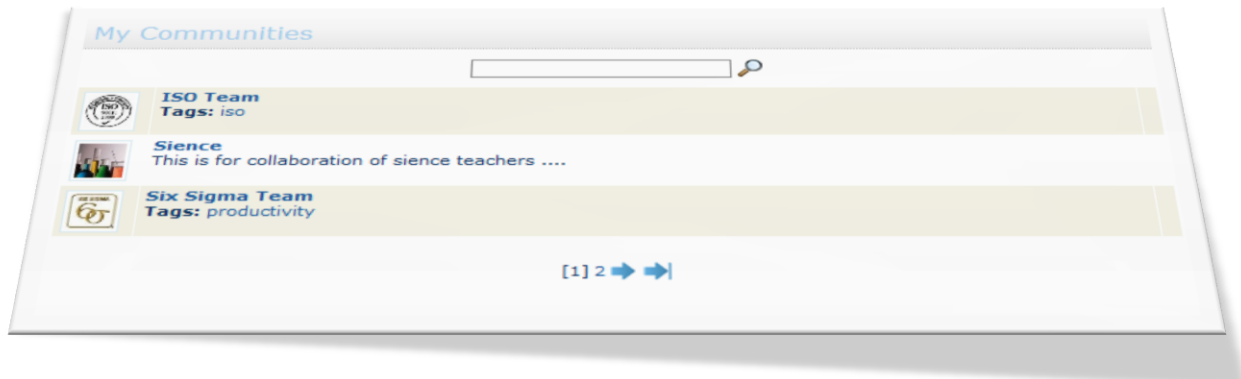

Activities include topics published, tags added, communities created, communities joined and personal status updates.

The portlet can show either the activities from all users or only the activities from the users connected with the viewer.

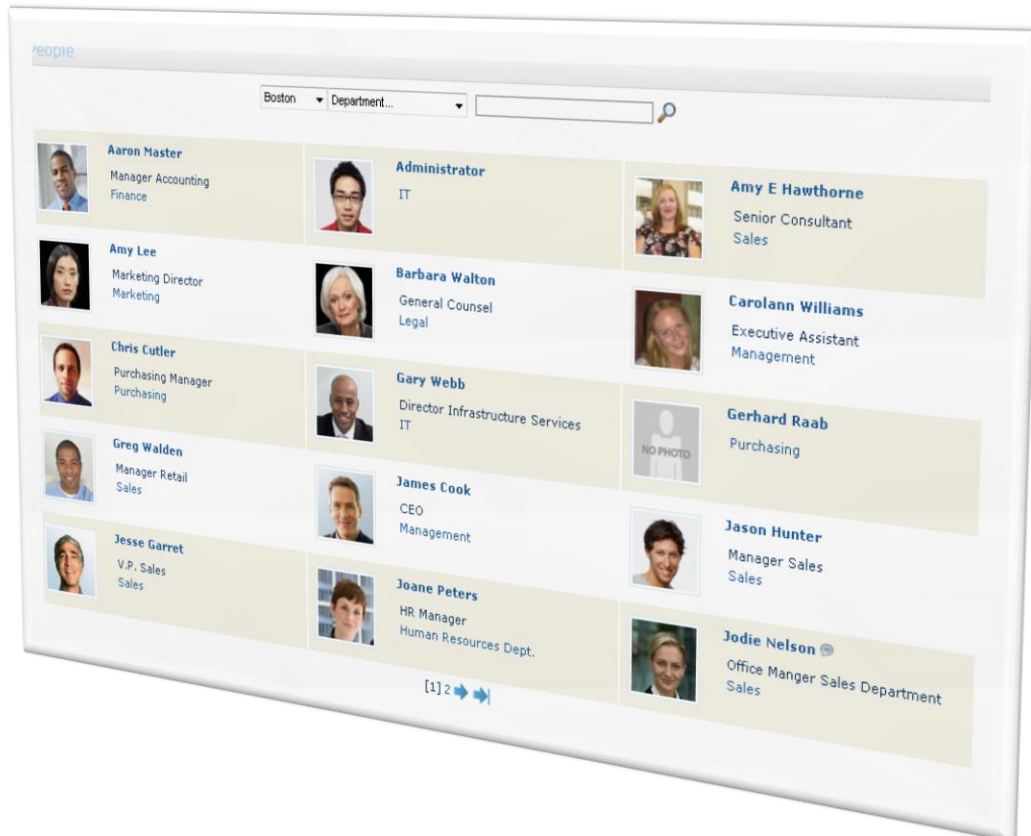

2.2 My Communities

The My Communities Portlet shows the new category image and provides paging and search capabilities. These extensions make it easier to locate a community even if hundreds of communities exist.

2.3 Role Member

The Role Member Portlet now also provides people search and paging capabilities. These new features allow users to view and browse roles with thousands of members.

2.4 Related Categories

The Related Categories maintains a list of links to help users quickly discover and navigate to related information. In comparison with the topic portlet (allows the creation of a static list of related categories as regular content) the viewer's permissions dynamically determine the links this portlet provides.

2.5 RSS Viewer

The server caches the existing RSS portlet and thus needs administrator setup. The new RSS viewer portlet uses AJAX to load the RSS data in real time. This allows users to show any RSS feed without involving an administrator.

2.6 Custom Portlet Chromes

Administrators can now define custom borders for each portlet on a page. This new feature provides more layout flexibility and the highlighting portlets on a page.

3 Miscellaneous

3.1 Instant Messaging

Instant Messaging is now free. Turn it on by going to Administration -> Configuration -> Collab.

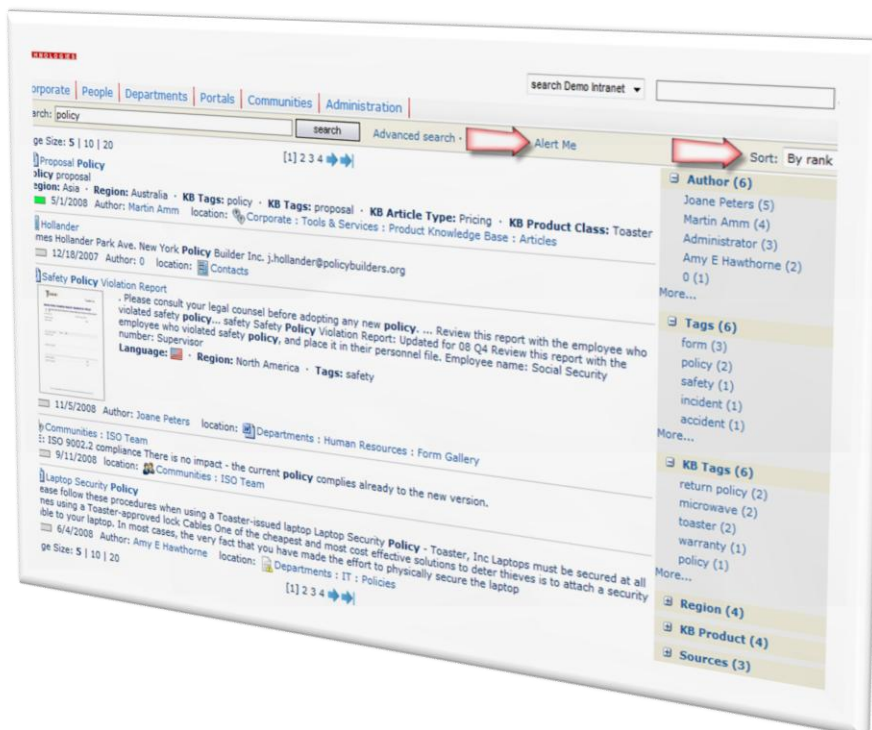

3.2 AJAX Paging

For a faster and smoother user experience, AJAX paging appears on the topic list, wiki, blog, image gallery, voting, news panel and bookmark list portlets. AJAX paging shows older and newer data within a portlet without requesting a whole new page from the server.

3.3 Search Enhancements

Users can create email alerts for specific search terms. Anytime a user's specific term appears or changes, the user receives an automated email with the new search results.

Users can change the Sort Order (by Date and by Rank) directly on the search results page.

4 Complete Change Log

| Type | Build | Changeld | Change |
|-------------|-------|----------|--|
| New Feature | 390 | 1001359 | Category Images: Implemented an option to upload and save a Category image. The image can appear in the Category Image portlet. |
| New Feature | 392 | 1001362 | Instant Messaging: IM is now part of the default distribution and enabled in Administration -> Configuration. |
| New Feature | 390 | 1001252 | New Portlet: Activities displays last events and activities. |
| New Feature | 392 | 1001374 | New Portlet: Related Categories to allow the selection of categories from a tree and showing them as shortcuts. |
| New Feature | 390 | 1001345 | New Portlet: RSS Viewer allows client-side defined RSS feeds. |
| New Feature | 398 | 1001443 | Portlets: added the option to define and select a custom "chrome" (border). |
| New Feature | 390 | 1001284 | Search and Notifications: Create a notification for a specific search terms. |
| New Feature | 390 | 1001303 | Topic Detail Page Redesign: The topic detail paged has a new design to match the layout of portal pages (e.g. the topic actions show as an actions drop down on the top right of the page). |
| Enhancement | 394 | 1001405 | Added support for Internet Explorer 8. |
| Enhancement | 379 | 1001257 | Bookmarklet: Implementing Bookmarklet functionality for Google Chrome and Safari Web Browsers. |
| Enhancement | 376 | 1001248 | Business Card: Delay business card pop-up window. |
| Enhancement | 392 | 1001366 | Category Management: New field "Tags" allows users to assign tags to categories. |
| Enhancement | 390 | 1001307 | Category Manager: New option 'Fixed Subcategory Template' on the publishing tab; setting 'Create From Template' automatically when 'Fixed Subcategory Template' is set in the parent category when creating a new subcategory. |
| Enhancement | 393 | 1001378 | Community Administration Portlet: Added new options to disable some configuration pages. The create Community Wizard can appear on a single page. |
| Enhancement | 387 | 1001305 | Community Administration Portlet: Setting the default parent category to selected category and added ability to set a create link caption. |
| Enhancement | 392 | 1001370 | Community Administration Portlet: Show create/edit community wizard as AJAX pop-up window. |
| Enhancement | 392 | 1001371 | Community wizard: New field "tags" can assign tags to communities. |
| Enhancement | 390 | 1001309 | Community wizard: Setting a page template automatically when 'Fixed Subcategory Template' is set in the parent category. |
| Enhancement | 377 | 1001231 | Configuration updates: Changes to development web.config and ASPX files. |
| Enhancement | 387 | 1001291 | Connections: Ability to disable connections in Photo and Organizational Network portlets by setting the Application Property Global EnableConnections to 0. |
| Enhancement | 390 | 1001283 | Database/Application Portlet: Message/alert to indicate successful saving of a New Record. |
| Enhancement | 396 | 1001433 | Gallery Portlet: Show Metadata. Added an option to show Tags and other Topic Properties either below the abstract or below the entire picture cell. |
| Enhancement | 395 | 1001420 | GroupNotifications: Added ability to get the group notifications mails without timestamp in create(change) topic date per AppProperty ("Notification","WithoutTimeStamp") = 1. |

| | | | |
|-------------|-----|---------|--|
| Enhancement | 394 | 1001411 | Help: Updated online help. |
| Enhancement | 390 | 1001271 | Ability to display date/time stamps in a verbose format (e.g. 2 hours ago) in Topic List, News and Activities Portlets. |
| Enhancement | 380 | 1001277 | Organization Network Portlet: Ability to disable the Report-to chain images indentation. |
| Enhancement | 392 | 1001360 | My Communities Portlet: Ability to search for communities. The portlet allows paging through the list of communities. |
| Enhancement | 392 | 1001369 | My Communities Portlet: New property "Show Category Image" can show the (new) category images in the community list for an easier identification of a community. |
| Enhancement | 382 | 1001301 | MyProfile and MyPage Links: Support for static MyProfile and MyPage Links. Added an option to use "My Profile" or "My Home" as the start page. A new Application Property "Portal HomePage" controls the start page: 0 = first tab (default), 1 = My Profile, 2 = My Home. |
| Enhancement | 377 | 1001236 | New Hires/Birthdays/Anniversaries Portlet: Ability to display the date directly behind the name. |
| Enhancement | 395 | 1001425 | News Panel Portlet: Preview Popups. Added an option to display preview popups when the mouse appears over a news item. |
| Enhancement | 392 | 1001368 | News Portlet: Ability to use AJAX paging for older items |
| Enhancement | 379 | 1001261 | Organization Chart Portlet: New Application Property OrgChart ShowDetails (can be set to 0 to hide phone and email address). |
| Enhancement | 380 | 1001290 | Photo Portlet: User Status Label. Added an option to put a label in front of the user status, which appears in the Photo portlet. |
| Enhancement | 379 | 1001265 | Picture Gallery: Hide Topic Portlets. Added an option to hide Topic Portlets from a Picture Gallery. |
| Enhancement | 393 | 1001398 | Portlet Properties: New option "Lock Portlet" allows Administrators to lock a portlet so that a category administrator can't remove the portlet or change the portlet properties. |
| Enhancement | 377 | 1001249 | Profiles: Assigning edit permissions instead of read permissions to the owner of a linked profile page. |
| Enhancement | 377 | 1001238 | Profiles: New My Page Mode. When enabled, selects the first updateable page when a user navigates to his or her own profile. |
| Enhancement | 390 | 1001298 | Profiles: Setting link pages as default instead of copy pages. |
| Enhancement | 380 | 1001263 | Profiles: The profile home page is automatically added to the "Shortcuts" portlet. |
| Enhancement | 394 | 1001400 | Reformat Active Directory (LDAP) Fields Added an option to reformat user data fields when synchronizing via LDAP (e.g. against Active Directory). The Domain_XXXXXX.ini file must be edited manually and a section [FieldFormats] must be added. Each line may contain a line "FieldName=FormatSpec", where FormatSpec may contain a combination of text and field references in curly brackets. For example, to put the last name, a comma and the first name into the display name field, add this: [FieldFormats] displayName={sn}, {givenName} |
| Enhancement | 390 | 1001357 | Report Designer: Provides an Office 2007 Ribbon style user interface. |
| Enhancement | 398 | 1001450 | Role Member Portlet: Ability to enable dynamic search and paging. |
| Enhancement | 376 | 1001232 | Role Member, Birthdays, New Hires Portlets: New "Image Only" and "Multiple Columns" modes. |

| | | | |
|-------------|-----|---------|--|
| Enhancement | 376 | 1001241 | <p>Search Enhancements</p> <p>Added sort option (by rank or by date) to main search page. Fixed sort by date issues for advanced search. Removed non-discreet Topic Properties from filter pane. Changed search retrieval logic to avoid database deadlocks.</p> <p>After applying the update, rebuild the search index.</p> |
| Enhancement | 377 | 1001234 | Shortcuts Portlet: Ability to display the full path in shortcuts names. |
| Enhancement | 377 | 1001256 | Thumbnails: Assuring the old thumbnail logic when the Application Property ("Images", "NoCrop") was set to 1. |
| Enhancement | 394 | 1001408 | Topic Details: Show publishing date. If a topic is not published, status and start date are display on the Topic detail page. |
| Enhancement | 396 | 1001414 | Topic history: new "topic activated" - / "topic expired" entries. |
| Enhancement | 392 | 1001365 | User Profiles / User Management: Ability to assign Tags also to user records. |
| Enhancement | 390 | 1001310 | <p>User Synchronization - Skip OU Levels</p> <p>Added option to skip bottom-level org units. A skipped org unit is not synchronized; its users are treated as though they were immediate occupants of the parent container.</p> <p>To activate this option, a line "SkipOrgUnitLevels=1" must be added in the [Header] section of the Domain_100xxxx.ini file.</p> |
| Enhancement | 398 | 1001435 | Voting Topic List Portlet: Added dynamic sorting. |
| Enhancement | 390 | 1001353 | <p>Wiki Portlet: it is now possible to use a customized XSL Template</p> <p>PortletPP: enter xsl template without path XSLTemplate must be located in "../templates/TileMgr/TileCustomize" directory</p> |
| Bug Fix | 380 | 1001295 | <p>AD Synch Manager - LDAP Input Fix</p> <p>Fixed a problem with the LDAP string input field in the Active Directory. Synchronization Manager: Default domain path sometimes replaced a non-default (manually entered) LDAP string when selecting "Synchronize all users."</p> |
| Bug Fix | 395 | 1001415 | Application Builder: Fixing the problem that alert mails are send for disabled users. |
| Bug Fix | 387 | 1001316 | Community Administration Portlet: Fixing a redirect error when inviting members and using Firefox. |
| Bug Fix | 377 | 1001243 | Configuration Wizard Settings Path: Use absolute path to store settings (ConfigSettings.xml). This avoids problems when invoking the Configuration Wizard from a different directory. |
| Bug Fix | 380 | 1001273 | DirectEdit: Fixing the problem that DirectEdit did not work after publishing new topics because kmTopics.kmWebDAVPath was not set. |
| Bug Fix | 390 | 1001341 | Fix URL Redirect. Direct links to portal pages (e.g. URLs in email notifications) sometimes did not work when the user had an expired portal session. |
| Bug Fix | 390 | 1001338 | Fix: Page title encoding. Fixed a problem with page titles when the category contained special characters. |
| Bug Fix | 379 | 1001262 | Flash Player: Fix Dropdown Bug. Show flash video player in "transparent" mode to allow dropdown menus appear on top of it. |

| | | | |
|---------|-----|---------|--|
| Bug Fix | 391 | 1001358 | HTML Editor: Bug Fixes <ul style="list-style-type: none"> - Fixed a problem when pasting content at the end of the line in Firefox 3 - the editor lost focus. - Fixed a layout problem with the OK/Cancel buttons on some dialogs (misaligned). - Fixed error "Cannot find a string resource with key 'ClearClass'" introduced in build 390. |
| Bug Fix | 387 | 1001313 | HTML Editor: Fixing the problem that sometimes a message "Permission Denied" appeared when adding content links; inserting blank automatically after the content link. |
| Bug Fix | 395 | 1001422 | HTML Editor: Several small fixes <ul style="list-style-type: none"> - Fixed a problem when editing a hyperlink inside a table cell in Firefox. - Fixed a problem with the align attribute of tables. - Fixed a problem with CSS attribute "undefined" being added to some elements' style. - Fixed a problem (general GDI+ exception) with some image types (e.g. jpg) when using the Image Editor. |
| Bug Fix | 380 | 1001274 | Link Publishing: Assuring that no "http:/" adding when publishing "mailto:"-links. |
| Bug Fix | 390 | 1001354 | Link Targets Fix. Fixed problem that caused unexpected behavior of "Bookmark/Link" Topics: In some cases the link used to open the document management page and not the actual link target. |
| Bug Fix | 387 | 1001324 | Member Portlet: Fixed Error 3265: Item cannot be found in the collection corresponding to the requested name or ordinal in MemberPortlet,MemberPortlet.RoleMembers at line 10650. |
| Bug Fix | 390 | 1001339 | Organizational Network Portlet: Ensured that disabled users don't show on the connections tab. |
| Bug Fix | 393 | 1001388 | Outlook Style Fixes. Improvements for several GUI elements under Outlook style. |
| Bug Fix | 393 | 1001393 | PDF Workflow: Fixed problem that the PDF Form sometimes did not show when starting a workflow. |
| Bug Fix | 380 | 1001294 | Portlets Wiki, Blog: Fixed problem that publishing period tab couldn't be selected. |
| Bug Fix | 377 | 1001235 | Profile Pages Indexing Fix. Fixed a problem which could make User Profile Pages appear in the search index, although that option was disabled. If User Profile Pages should intentionally be added to the search engine, set the Application Property MyPage.Index = 1. |
| Bug Fix | 380 | 1001281 | Recycle Bin: Categories and Topics remained hidden in the database. This fix also deletes the leftover old items. |
| Bug Fix | 390 | 1001342 | RSS Feeds: The download of external RSS feeds failed with certain security configurations. |
| Bug Fix | 390 | 1001332 | Search - Concurrency Issues. Fixed deadlock errors under multiple concurrent search requests. |
| Bug Fix | 387 | 1001328 | Solutions Import Export: Fixed problem that unicode text fields were imported with length 1. |
| Bug Fix | 396 | 1001428 | Tagging: Fixed Combined Tags Re-Upload. Fixed problem, which could cause tag keywords to be lost or saved as a single keyword when a new document version was uploaded. |
| Bug Fix | 377 | 1001245 | Template Email Replacement Tags: Fixed the problem that IDs are displayed instead of Strings by database look-up fields. |

| | | | |
|---------|-----|---------|---|
| Bug Fix | 392 | 1001361 | Topic Lifetime Control: The last changed date wasn't updated when a topic became published in the future, which resulted in missed notifications. |
| Bug Fix | 380 | 1001280 | Topic Portlet: Fixed the error "Portal is not associated with a category." |
| Bug Fix | 377 | 1001259 | Web Folders: Fixed character encoding issue. Fixed a problem in the Web Folders' interface with category names that contain a single quote character. |
| Bug Fix | 390 | 1001333 | Web Folders use adenin temp folder. When uploading a file through Web Folders, the adenin folder ...\adenin\temp is the temporary location for the uploaded file. (The previous setup used the Windows temp folder, which could cause permission problems in non-standard security configurations.) |
